

Guaranteed Quality

5+ years guarantee

We have carefully selected our partner clinic by taking into account all the factors that are required for a successful dental treatment. We only work with officially recognised and attested partners. Only by being confident in the quality of the medical act, we can offer a 5 year+ guarantee to our patients. Every dental work is guaranteed as follows:

- Dental Implants (bredent, STRAUMANN, MIS, MEGAGEN, ARDS, IHDE) - 5 years
- Dental Crowns - 3 to 5 years
- Veneers - 3 to 5 years

In the unlikely case that anything bad might happen, we will support the costs related to the transport/accommodation and all necessary medical interventions done at our clinic.

Conditions

The guarantee is valid if the following conditions are met:

1. You will maintain a good oral hygiene and follow the Doctor's indications
2. You will perform dental checkups every 6 months
3. You don't have or won't get diabetes, epilepsy, osteoporosis, chemotherapy-induced states
4. You are not and won't be engaged in contact sports
5. The problem was not caused by a strong physical force (fall, impact, car/bike accident)
6. All subsequent dental interventions will be reported

The guarantee for smokers is less than for non-smokers in the case of dental implants.

Experienced and qualified staff

Our doctors are experienced and highly trained, each in his or her own dentistry specialization. Each year they undergo continuous specialization courses in order to keep up-to-date with the latest techniques and equipment. Every one has a passion for dentistry and this is visible on every treated case. All clinic personnel is patient-oriented and speaks fluent English.

State of the art medical equipment and materials

Continuous investments are being made to provide doctors with the most effective ways of treating patients. A great deal of attention goes into the sterilization procedure and equipment. The manager has extensive experience in working as a dental technician in the USA and as a result only the most enduring materials are being used in every treatment. Having an in-house dental laboratory is a great asset for insuring a perfect-match for every dental work.

Multidisciplinary approach

There are no standard templates applied. Each patient is regarded as a unique case by a multidisciplinary team made of a doctor specialized in general dentistry, one orthodontist, one surgeon and one dental technician. This approach ensures that the case is viewed from all medical perspectives and that the proposed treatment leads to the desired outcome without complications.

Top standards in medical procedures

The current team of doctors, nurses and technicians manages to deliver quality dental care by following a strict set of procedures. Nothing is left to chance, thus treatments are done in a timely manner, with a minimum waiting time and to a high quality standard.
